

# Y CAMP STAFF BEING CHOSEN

### Prospectus New Out Shows Improvements and New Features Planned.

The Y.M.C.A. Camp prospectus has been released to 400 prospective campers. The camp this year will be under the direction of W. S. Stubbs, formerly associated with Mr. Keeter, the former camp director. H. N. Morford, who succeeds Mr. Keeter in the Boys' Department of the "Y," will work with the camp director and will specifically be in charge of religious education and dramatics. Mr. Morford has had wide experience in this branch of work, having been graduated from Crozier Theological School and having had several years' experience in the ministry, being an ordained minister of the Baptist Church.

Mr. Morford was formerly associated with the Cortland Y.M.C.A. as county boys' secretary. A. Leo Fox, who has been associated with the camp for the past two seasons as assistant director of physical education and who is a graduate of Syracuse University, will be in charge of the physical education program. Seven other camp leaders who will each be responsible for a tent group of seven boys and who will serve on a paid basis, have been selected. With one exception, these leaders are High School graduates or college students.

This year the camp will operate on a three-week period basis. The first period will run from July 1 to July 22; the second period will operate from July 24 to August 14. The first period from July 1 to 23 is held exclusively for boys nine to 12 years of age. These boys are called the "Friendly Indians" and their camp program is set up on the basis of Indian lore. The local Y is the pioneer in New York State in work with boys under 12 years of age. This camp for younger boys began as an experiment in 1927 and proved to be such a tremendous success that it has since been enthusiastically carried on. The Y is equipped to handle not more than 70 boys in this period and as much as registrants from the Cortland and Ithaca Friendly Indian organizations are accepted, the local boys who are interested should get their applications to the Y.M.C.A. at their earliest possible convenience. Membership in a Friendly Indian club or in the Y.M.C.A. is not required.

## FINE FISH CATCHES ARE REPORTED OVER WEEK-END

The followers of the famous Isaac Walton were rewarded over the week-end for their patience. Arthur O'Connor brought home a four pound brown trout from Skaneateles Lake while Seward Budge had several steel-heads from the same waters.

Neilson Adams has the catch of the hunch; a five pound lake trout will grace his table before long. The largest lake trout that has been caught previously this year weighed only four pounds, 14 ounces, so Mr. Adams has the honor of the largest fish so far this season from Otisco Lake.

Edward Darrow snared an 11 1/2 inch maffa trout in Bennett Brook, to reward his endeavors.

## Weather for Eclipse Unfavorable

San Francisco, April 28.—(AP)—United States Weather Bureau here early today forecast unfavorable conditions for the mountain area where scientists gathered to watch the solar eclipse at 11 a. m. Pacific Standard time. More favorable conditions for valley areas in the path of the eclipse were indicated, however.

Camptonville, Cal., April 28.—(AP)—Rain, which was falling at 7 a. m., P. M. S. T., caused apprehension among the large group of scientists gathered here to photograph the eclipse of the sun. Slight hope was held, however, that the sky would clear before 11 a. m., when the period of totality begins.

San Francisco, April 28.—(AP)—The moon, passing in front of the sun, today will cast a shadow a half mile wide on the earth, and scientists, with the aid of radio, telescope, airplane and spectroscopy, were carefully prepared for an attempt to record the event for posterity.

The path of totality will start about 300 miles at sea and sweep eastward just north of San Francisco across the Sierra Mountains. Totality will occur at approximately 11 a. m. (P. M. S. T.).

Ingenuity of scores of scientists will be taxed by efforts to photograph the shadow which will speed at the rate of 1,200 miles an hour. The total eclipse will last but 1.3 seconds.

Thousands of dollars have been spent in minute preparations by scientists who stood beside sky cameras, and aviators prepared to soar aloft 15,000 feet to record the phenomenon.

Atmospheric conditions were expected to be clear but the experts at the various camps were fearful that fog or clouds lasting only a minute or two between 11 a. m. and noon might nullify the preparations which required months to complete.

The largest expedition of scientists, from Lick Observatory of the University of California, was located at Camptonville, in Northern California. Dr. J. H. Moore, astronomer, was in charge of a group of nearly 20 persons.

Police today are searching for Andrew Paternostris alias Andrew Paterson, for the alleged abduction of Emilia Sawaryn, 14 year old daughter of Mr. and Mrs. Emil Sawaryn of 151 Perrine Street, who left her home to attend a dance Saturday evening at Falcon Home. It is charged she was later with Paternostris. A warrant has been sworn out for the man by Mr. Sawaryn, charging him with abduction.

According to police records, Paternostris is an ex-convict having served a term of from two to four years in Auburn Prison for bigamy. He was brought to Auburn from Buffalo where he has a wife living. He was released from prison November 22, 1929.

The girl's father claims that the ex-convict became acquainted with his daughter while he was a convict. Paternostris worked on one of the prison trucks carrying rubbish to the Perrine Street dumping grounds. He also says that the man when he was released spent a night at the Sawaryn home and has a friend who is known to him as "Coco".

Mr. Sawaryn was taken to the prison where he identified a picture of Paternostris as the man with whom his daughter was seen.

When the girl left her home Saturday evening she wore a brown coat, flesh colored stockings, green waist and a gypsis colored shirt. She is five feet, three inches tall, has blue hair, blue eyes and is dark complexioned.

Paternostris is six feet, tall, has black hair and is between 25 and 30 years of age. So far no trace of the missing girl or wanted man has been found, say the police.

### Timothy Byrne, 59, of Auburn R. D. 3, is a patient at the City Hospital, where he was operated at 11 o'clock this morning suffering a deep laceration on the right side of his face. The injured man was treated by Dr. Gipson B. Mack.

## TWO TO RUN AGAIN FOR SCHOOL BOARD

Petitions were filed Saturday with the Auburn Board of Education for the designation of Jeanie S. Hughtitt and Dr. Raymond F. Johnson as candidates for re-election as school commissioners. A substantial list of signatures accompanied the petition, indicating unqualified approval of the services of the two candidates. No other petitions were filed.

The failure of any other candidate to file a petition is taken as evidence of satisfaction with the incumbents who are running for re-election. Mrs. Hughtitt through long years of experience as a teacher in Auburn schools is in intimate touch with problems of instruction; and Doctor Johnson has proved himself a valuable addition to the Board of Education because of his grasp of health matters. The school election is scheduled for May 6, 1930.

## SOVIETS OPEN RAILROAD OVER TRACKLESS WASTES

Alinabulak, Kazakhstan Soviet Republic, April 26.—(AP)—Over lifeless deserts, trackless plains and peopleless mountain-lands, once traversed by Alexander the Great and Tamerlane the Conqueror, the Soviet government today opened a modern 1,700-mile-long railroad of its own construction, connecting the present Central Asia Railroad at Aris, Uzbekistan, with the Great Trans-Siberian Railway at Novosibirsk.

The new road changes the whole face of middle Asia and transforms Kazakhstan, which is the largest autonomous republic within the Soviet federation, into a region of great potential economic significance.

Next the huge Dniپر's hydro-electric plant on the Dniپر River, which is being supervised by Col. Hugh L. Cooper, engineer of New York, this new railroad, which was built entirely with native labor and without foreign technical or financial assistance, is the greatest single mechanical achievement of the communist government since it came into power 12 years ago. It cost \$100,000,000 and its construction occupied four years.
